

Platform.sh is good for you and your customers

Huge workflow advantages

Agencies are making savings of
\$16,000 - \$400,000

For every Git branch, a complete environment: nobody else offers this. New branches have fully consistent copies of data, infrastructure, and code in minutes, even for large databases.

Platform.sh is suitable for all PHP applications, not just Drupal or Symfony, and we offer more supported technologies than anyone else: MariaDB, PostgreSQL, MongoDB, Solr, Elasticsearch, Redis - with more to come in 2015 including Node.js

Better high availability & seamless scaling

Unique to this market

Platform.sh Enterprise's triple redundant architecture provides guaranteed database transaction integrity and zero downtime scaling. Scale your application to 100+ CPUs and 180+GB of RAM to accommodate both scheduled and unexpected peak traffic, with absolutely no interruptions or downtime.

99.99% reduction uptime SLA

Best offer available

We're the ONLY specialist Drupal hosting vendor offering a 4 * 9's SLA, which guarantees less than 4 minutes downtime per month. The next best container based vendor offers 3 * 9's which is over 44 minutes downtime; that's a no-penalty outage lasting over ten times longer ! As any online merchant will tell you, a lot of reputational damage can be done and a lot of money lost if you're down for this long during peak traffic.

10% agency rebates & free projects for your whole team

The Platform.sh Agency Plan (PAP) waives developer license fees, lets anyone on your team start projects at no cost, and permits all-hands access to any site. In addition you get a 10% commission when you recommend Platform.sh to your customers.

Drupal application & site support

Available globally 24x7x365

We've been providing application support for 5 years on many of the 300 commerce projects the Commerce Guys' professional services group have delivered. We know Drupal very well, the Drupal Commerce distribution is currently active in over 55,000 sites globally.

Platform.sh is a continuous deployment cloud hosting solution that can scale applications from the smallest project to ones handling millions of visitors. It is ideal for agile software teams because of its unique feature: it can replicate a live production cluster in seconds and create byte-level clones of throwaway dev and staging environments, which makes testing and validation up to 7 times faster. It can provide 99.99% SLAs thanks to 24/7 follow-the-sun support combined with a unique, triple-redundant architecture that's based on a high density grid of Linux micro-containers. With employees across five continents, the company serves thousands of clients worldwide, including Vivienne Westwood, The Canadian Football League, The British Council, and Flixbus.
