

# Unlock innovation with Platform.sh

The marketplace changes at a dizzying pace. And every time you think you can finally slow down and catch your breath, the changes start coming at you twice as fast. The only hope for keeping up with the pace of change is to match it with your pace of innovation.

But the resources you need to continually update your application and website offerings are being eaten up by infrastructure costs. Every dollar you spend on hardware, licensing, and management is one less dollar you can spend on building exciting new experiences for your customers.

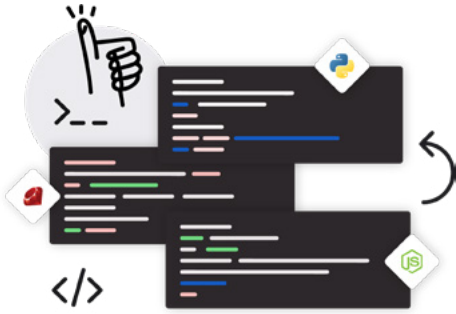

Platform.sh is the end-to-end web platform that unlocks your ability to innovate. With Platform.sh, you no longer have to waste your time and money on building and managing core infrastructure. We take care of your multicloud hosting, management, and operations needs, freeing you to focus on creating and improving your products.

**“Platform.sh enables us to use a single solution provider for all the different technologies and approaches we use for our projects.”**

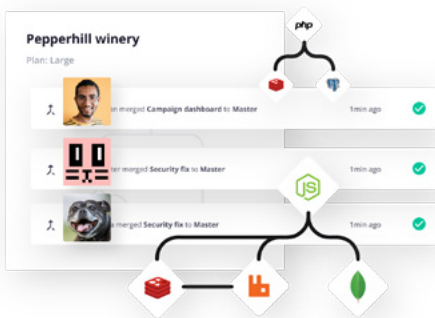

- Rainer Friederich  
CTO and Managing Partner // WONDROUS

## The Platform.sh payoff

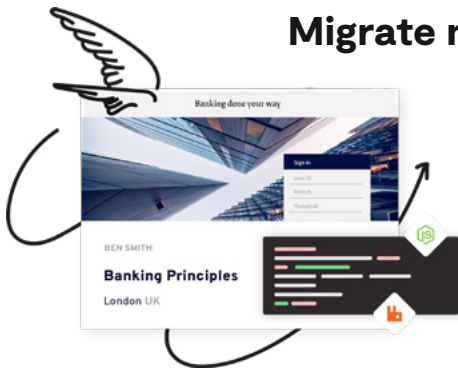

- Sharpen your competitive edge through faster delivery, higher reliability, and a greater quality of services
- Open up new revenue streams by delivering on digital transformation initiatives
- Rev up your efficiency by consolidating tools
- Demolish collaboration roadblocks so your teams can work at full speed

## Innovation made easy

Platform.sh doesn't require a massive investment to get started. It works right out of the box, so you can immediately begin building world-class digital experiences. We support not only the languages, architectures, and frameworks that are popular today, but the ones that will revolutionize development tomorrow, keeping you innovating for years to come. And Platform.sh will never lock you into outdated tools.

## Migrate now, scale later

With Platform.sh, you can migrate your current applications without re-creating them. And you can scale your data services as you see fit. Start with the core features you need, then grow your services as your organization and customers demand.
